## **FS/ EAP TRAINING AND DRILLS**

As we begin another year of FS/ EAP Training, the staff at DSSI would like to remind all Building Managers and Chief Engineers of the importance of attendance at all this years scheduled training sessions for both Building Staff and Warden Teams.

Recent news reports should remind us all that the threat of World Wide Terrorism is real, and sadly NYC remains a primary target.

Trainers at DSSI have observed that the number of participants, particularly at warden training sessions, has declined over the years indicating a level of complacency that will no doubt complicate your ability to implement the building FS/ EAP Plans.

We recommend you strongly remind your staff and your warden teams of the importance of these mandatory training sessions.

Any questions please contact us at 212-240-9500.
